REMARKS – General

Applicant has re-written claims to address Examiner's Section 101 rejection and Examiner's Section 112 rejection.

Claims 1-11 and 18-21 have been cancelled to address the Section 102 rejection.

Applicant have added additional element involving the having and processing of an order book to the base Independent Claim (New Claim 22). These elements should address the Prior Art rejections based on Minton (US Pat. 6,014,643) in view of Wallman (US Pat. 6,601,044). These new elements are novel and are not obvious to someone skilled in the Arts.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

Respectfully submitted,
